Karan Joshi

SUMMARY:
DevOps Engineer with 7 years of experience in software development and systems administration, specializing in containerization and continuous integration. Proven track record of implementing and managing scalable infrastructure using Docker, Kubernetes, and Jenkins. Adept at collaborating with development teams to streamline operations and improve deployment efficiency.

EXPERIENCE:

DevOps Engineer
TechNova Solutions, Hyderabad, Telangana
July 2019 - Present
- Designed and implemented CI/CD pipelines using Jenkins, enhancing deployment speed by 30%.
- Managed container orchestration with Kubernetes, improving application scalability and reliability.
- Collaborated with cross-functional teams to automate infrastructure provisioning and configuration management.

Senior DevOps Engineer
CloudSphere Technologies, Hyderabad, Telangana
January 2017 - June 2019
- Developed and maintained Docker container images for microservices, reducing application load times by 25%.
- Led migration of legacy applications to Kubernetes, ensuring high availability and fault tolerance.
- Conducted training sessions for development teams on best practices for DevOps tools and methodologies.

DevOps Engineer
Innovatech Systems, Hyderabad, Telangana
June 2015 - December 2016
- Assisted in the deployment of applications using Jenkins, facilitating a smooth transition to automated processes.
- Implemented monitoring and logging solutions, improving incident response times and system reliability.
- Collaborated with QA teams to integrate automated testing within the deployment pipeline.

SKILLS:
Docker, Kubernetes, Jenkins

EDUCATION:
Bachelor of Technology in Computer Science Engineering
Jawaharlal Nehru Technological University, Hyderabad, Telangana
Graduated: 2014
